CULTURE OF SYDNEY

POPULATION

Culture is the combination of characteristics and knowledge from a group of people or society. I am an international student from Malaysia and the lifestyle in Sydney, Australia is totally different from my home country. According to the official website, Sydney has a long rich cultural history. At least 60,000 years ago, Gadigal people who originally settled in this location. Until 1970s, a huge immigration from European and American to this city and this is leading to cultural fusion between European and American.

The first points need to be described is population. The Australian population consists of British, Irish, Chinese, and so on. There is a huge variety of ethnic values with the Australian self. For example, Australian believe genital grabbing is the best way to say hello in Australia.

RELIGION

Moving further to religion. Although Australia is a high degree of freedom in religion but currently Christianity is the most dominant religion in Australia. Since they are in high degree of freedom in religion, therefore conversion about religion is usually welcome in private settings and among familiar people.

ARTS & MUSIC

Finally, will be the art and music. Sydney has been home to many visual artists or musician. Many well-known artists love to display their art in the gallery and the musician love to performance around the city.

In the end, cultures can be seen as evidence of a successful growth for a city but it is a challenging to maintaining diversity and balancing the views of all parties.
